Alternative Solid Waste Management System Feasibility Study – Q/A

March 21, 2025

1. How will the RFQ be graded? Will it be graded based on price, qualifications, or a combination of both? Is there specific evaluation criteria?

Proposals will be graded based on the criteria listed in Section V. in the RFQ, items are listed in order of importance.

2. Although this RFQ outlines qualifications, it also includes elements of a proposal. Is a budget for all services required?

A complete budget for the scope of this RFQ is required.

3. Is the purpose of this RFQ to evaluate all three options to the full scope and provide conceptual drawing?

The purpose of this RFQ is to conduct and confirm the analysis from the 2017 Solid Waste Master Plan recommendation, select the most economical option, and provide a final recommendation.

4. Are conceptual drawings required for all alternatives?

Conceptual drawings are only required for the best alternative, this study is a “pick-one” not a mix of multiple alternatives.
